

Executive Management & Financial Cost Analysis

Acute Support Case Trends, Support Analyst Effort & Automation Savings Potential

Author: Lee Booth

Date: August 2026

Scope: Meds & Symphony Support Suites (7 Trend Files)

Target Audience: Senior Operations & Transformation Leadership

1. Executive Summary

This management report presents a rigorous, evidence-based evaluation of operational ticket demand across the **Meds** and **Symphony** support suites, analyzing **724 cases** spanning 5 core technical trends (Robot, Merge, Lock, Audit, DAD) over a 12-month period. The analysis couples ServiceNow SLA tracking with financial modeling of analyst labor costs based on an average Support Analyst base salary of **£28,000/annum** to quantify baseline operational expenditure and identify actionable cost reduction opportunities.

Key Financial & Operational Findings (Based on £28,000 Base Salary):

- **Total Volume & Effort:** 724 cases consume approximately **844 hours** of direct analyst touch-time annually.
- **Baseline Labor Spend:** At an average base salary of **£28,000/annum** (plus 25% employer on-costs = £35,000 TCOE; £21.88/hr), direct labor expenditure on these 5 trends is **£18,462.50 annually**.
- **Targeted Savings Potential:** Implementing targeted interventions (RPA automation, self-service tools, and triage KB articles) can eliminate **~70.7%** of manual handling.
- **Net Business Impact:** **£13,050.76 in annual financial savings** and **596.5 analyst hours freed** for higher-value transformation engineering.

2. Product & Trend Dataset Breakdown (7 Worksheets)

The underlying dataset comprises 7 distinct datasets: 2 product-level combined sheets (Meds Combined and Symphony Combined) and 5 granular trend worksheets. The table below details ticket volume, SLA tracking coverage, resolution rates, and resolution speed.

Product Suite	Trend Worksheet	Total Cases	SLA Matched	Resolved Cases	Median TTR	Median SLA Business
Meds	Meds Combined	454	398 (87.7%)	445 (98.0%)	4h 22m	2h 55m
Meds	Robot	156	140 (89.7%)	153 (98.1%)	1h 51m	1h 50m
Meds	Merge	132	124 (93.9%)	127 (96.2%)	1d 22h 45m	6h 20m
Meds	Lock	166	134 (80.7%)	165 (99.4%)	3h 35m	2h 31m
Symphony	Symphony Combined	270	234 (86.7%)	267 (98.9%)	20h 31m	3h 44m
Symphony	Audit	122	109 (89.3%)	120 (98.4%)	1d 21h 10m	7h 35m
Symphony	DAD	148	125 (84.5%)	147 (99.3%)	3h 31m	1h 33m
TOTAL	All Trends (724)	724	632 (87.3%)	712 (98.3%)	--	--

3. Financial Model & Support Analyst Costings

Acute Support — Executive Management & Cost Analysis Report

To establish direct support expenditure, analyst compensation is converted into an effective hourly rate based on an average Support Analyst salary of £28,000. Active handling time ('touch time') is modeled per case type to isolate true labor effort from passive ServiceNow ticket queue elapsed time (TTR).

Baseline Financial Parameters (£28k Salary Basis):

- **Support Analyst Base Salary:** £28,000 / year
- **Employer On-Costs (NI, Pension, Overheads @ 25%):** £7,000 / year
- **Total Cost of Employment (TCOE):** £35,000 / year
- **Effective Annual Productive Hours:** 1,600 hours (37.5 hrs/wk less leave, training & admin)
- **Fully Loaded Analyst Hourly Rate:** £21.875 / hour (£35,000 / 1,600 hrs)

Trend Category	Cases	Avg Touch Time	Total Labor Hours	Baseline Labor Cost	Target Savings %	Hours Saved	Annual Savings (£)
Robot (Meds)	156	0.75 hrs (45m)	117.0 hrs	£2,559.38	80.0%	93.6 hrs	£2,047.50
Merge (Meds)	132	2.50 hrs (150m)	330.0 hrs	£7,218.75	50.0%	165.0 hrs	£3,609.38
Lock (Meds)	166	0.50 hrs (30m)	83.0 hrs	£1,815.63	90.0%	74.7 hrs	£1,634.06
Audit (Symphony)	122	1.50 hrs (90m)	183.0 hrs	£4,003.13	75.0%	137.3 hrs	£3,002.34
DAD (Symphony)	148	0.75 hrs (45m)	111.0 hrs	£2,428.13	60.0%	66.6 hrs	£1,456.88
TOTAL / OVERALL	724	1.17 hrs avg	844.0 hrs	£18,462.50	70.7%	596.5 hrs	£13,050.76

4. Strategic Action Plan & Target Interventions

To capture the identified **£13,050.76 annual savings** and eliminate **596.5 hours of routine manual effort**, a prioritized transformation roadmap is recommended:

Priority 1 — Lock & Robot Automation (Immediate ROI)

- **Meds Lock Cases (166 cases / £1.82k cost):** Implement an automated DB session unlock daemon or user self-service portal. Target reduction: 90% (£1.63k annual savings, 74.7 hrs freed).
- **Meds Robot Cases (156 cases / £2.56k cost):** Deploy RPA scripts for automated picking ticket printing error resolution. Target reduction: 80% (£2.05k annual savings, 93.6 hrs freed).

Priority 2 — Symphony Audit Portal & DAD Auto-Diagnostics

- **Symphony Audit Cases (122 cases / £4.00k cost):** Build a self-service compliance audit report extractor. Target reduction: 75% (£3.00k annual savings, 137.3 hrs freed).
- **Symphony DAD Cases (148 cases / £2.43k cost):** Implement automated diagnostic tools and triage rules for digital asset errors. Target reduction: 60% (£1.46k annual savings, 66.6 hrs freed).

Priority 3 — Meds Patient Merge Triage & Wizard

- **Meds Merge Cases (132 cases / £7.22k cost):** Patient record merges represent the highest single labor drain (330 total hours). Develop a guided validation wizard and automated pre-check script to reduce touch time by 50% (£3.61k annual savings, 165.0 hrs freed).
